41)
Among the following identify the one in which dimensionality reduction reduces.
a) Performance
b) statistics
c) Entropy
d) Collinearity
42) Which of the following machine learning algorithm is based upon the idea of bagging?
a) Decision Tree
b) Random Forest
c) Classfication
d) SVM
43) Choose a disadvantage of decision trees among the following.
a) Decision tree robust to outliers
b) Factor analysis
c) Decision Tree are prone to overfit
c) Decision Tree are prone to overfit d) all of the above
d) all of the above
d) all of the above 44)
d) all of the above  44)  What is the term known as on which the machine learning algorithms build a model based on
d) all of the above  44)  What is the term known as on which the machine learning algorithms build a model based on sample data?
d) all of the above  44)  What is the term known as on which the machine learning algorithms build a model based on sample data?  a) Data Training
d) all of the above  44)  What is the term known as on which the machine learning algorithms build a model based on sample data?  a) Data Training  b) Sample Data
d) all of the above  44)  What is the term known as on which the machine learning algorithms build a model based on sample data?  a) Data Training  b) Sample Data  c) Training data
d) all of the above  44)  What is the term known as on which the machine learning algorithms build a model based on sample data?  a) Data Training  b) Sample Data  c) Training data  d) None of the above
d) all of the above  44)  What is the term known as on which the machine learning algorithms build a model based on sample data?  a) Data Training  b) Sample Data  c) Training data  d) None of the above  45)
d) all of the above  44)  What is the term known as on which the machine learning algorithms build a model based on sample data?  a) Data Training b) Sample Data c) Training data d) None of the above  45)  Which of the following machine learning techniques helps in detecting the outliers in data?

c) Anamoly detection
d) All of the above
46)
Identify the incorrect numerical functions in the various function representation of machine
learning.
a) Support Vector
b) Regression
c) Case based
d) Classification
47)
Analysis of ML algorithm needs
a) Statistical learning theory
b) Computational learning theory
c) None of the above
d) Both a and b
48)
Identify the difficulties with the k-nearest neighbor algorithm.
a) Curse of dimensionality
b) Calculate the distance of test case for all training cases
c) Both a and b
d) None
49)
The total types of the layer in radial basis function neural networks is
a) 1
b) 2
<mark>c) 3</mark>
d) 4

Which of the following is not a supervised learning

## <mark>a) PCA</mark>

- b) Naïve bayes
- c) Linear regression
- d) KMeans
